**All systems** above include the necessary safety sensors, motors, springs, remotes, chains, bolts, etc. to have the system working properly and safely. Ancillary add-ons can enhance the user experience for your specific needs. Shipping and handling typically ranges from \$500 to \$3,500 depending on location.

**Commercial Systems** - These are systems that use a pad-mount commercial grade motor and a rigid gate panel. These work for any application including high-usage commercial projects as well as low-usage residential or ranch projects.

**Residential Systems** - These are systems that use a residential grade motor and a collapsible gate panel. The gate "hangs" from the top cross bar on hinges and will collapse closed with lifted vertically. These work well for residential, ranch, HOA, and light commercial projects.
